As the fields of sports medicine and sports dentistry evolve, so too does the role and responsibilities of the Team Dentist. The clinician requires sport specific knowledge and special training in order to work to his or her capacity in amateur or professional sporting events. In the Academy we feel that this course will help the practitioners carry out their responsibilities in an appropriate manner.

This course is primarily designed to meet the educational needs of clinical dentists from all fields of dentistry who care for and participate in sports teams as part of their practice. With the completion of the ASD Team Dentist Course the clinician will have been presented with the information needed to perform his or her duties as a team dentist.

The responsibilities of a "Team Dentist"

- Organizing dental care for a specific team.
- Delivering dental care to the athletes.
- Pre-participation dental exam and medical history.
- Treatment of dental conditions and injuries with return to activity recommendation.
- Identification and proper referral of psychological and drug problems.
- Participating in the development of a mouthguard program.
- Providing coverage for games and other sports competition.

Course Objectives:

- Provide information needed to become and carry out your role as a team dentist.
- Identify specific situations and problems encountered in various sports (baseball, football, hockey, boxing, etc.)
- Explain the basic principles of prevention of dental injuries.
- Understand the guidelines for, and be able to fabricate a properly fitted mouthguard.
- Identify and provide diagnosis and treatment of various dental problems of the athletes including those in active competition.
- Identify the role of therapeutic drugs, performance-enhancing drugs and recognize drug abuse in sports.

Course Description:

This course is intended to provide additional knowledge to the dentist in a sports-related environment. Clinicians interested in learning the basic information necessary to perform the duties of a "Team Dentist" along with the responsibilities of the dentist as a member of the medical service team will be discussed. Upon the completion of this program the dentist will receive verification from the ASD for 10.25 hours of continuing education credits.
The mouthguard workshop will involve Drs. McNev, Mills and Hoy with experience in mouthguard construction as tutors. This is a hands-on course, teaching the latest mouthguard designs and techniques. The mouthguard workshop will cover mouthguard design and fabrication with a focus on pressure lamination techniques. A lecture and a video will start the workshop, outlining sporting injury patterns and the mouthguard designs to reduce such injuries. Recent exciting research from Japan in impact energy reduction will be discussed. Each participant will be provided with correctly trimmed maxillary models for the workshop or you may bring your personal models trimmed to a 1” base and within 2mm of the vestibule.

At the conclusion of the workshop, participants will have the knowledge to construct their own mouthguards or communicate the appropriate information to their dental laboratory.

Speaker: David Grogan, DDS
11:00 am – 11:45 am Hands-on Suturing Workshop I

This presentation will cover therapeutic agents commonly used to keep our athletes alert and free of pain and infection without violating rules of the sports-governing bodies. Knowledge of drugs to use for acute situations and the possible drug side effects help keep our athletes ready for competition. This presentation will also cover some common infections in the oral-facial area that are highly infectious and of concern for the safety of our athletes’ teammates. This information should be of interest for those treating the full athletic spectrum from the young weekend participant to the highly elite competitor. The team dentist needs to work within the parameter of permitted drugs and outside the realm of PEDs (performance enhancing drugs), doping and banned/legal drugs. The treating dentist should also have the resources to recognize these drugs. Reference information is listed to help keep the team dentist knowledgeable about banned legal or illegal drugs and substances.

Speaker: Leslie Rye, DDS, FASD, FAGD, FICD
2:50 pm – 3:30 pm Team Dentist: Drugs and Athletes

Whether on the field, court or ice rink, it is important for the team dentist to recognize and manage dental trauma. With the high-paced sports we watch come severe injuries that require the same briskness in dealing with them. It is important for the team dentist to triage the more serious medical injuries on our medical colleagues and provide first-line dental treatment. This requires the team dentist to make an immediate diagnosis and to manage their patients’ emergency dental concerns on site so they can be referred on to their own dentists for definitive treatment. The decisions made at the site of the trauma strongly influence the long-term outcomes for patients. Dental injuries can be classified into those requiring immediate attention (within 5 minutes), urgent attention (within 6 hours) and less urgent attention (within 12 hours). It is a race against the clock. This is especially true for tooth avulsion. Immediate reimplantation gives these teeth the best possible long-term prognosis. Delay in tooth replantation most certainly will lead to the eventual loss of the tooth. Dental injuries where the tooth is displaced, such as intrusion from a blow to the face and lateral luxations, require urgent care by the team dentist. Your goal for these injuries involves repositioning and stabilizing the teeth in question. It is dental traumatology made easy.

Speaker: David Grogan, DDS
11:00 am – 11:45 am Hands-on Suturing Workshop I

For a sports team dentist at any level, preparation and readiness is of utmost importance. We will be focusing on the key issues of pre-season exams, dealing with the athletes, and possible emergencies both on and off the playing surface. This presentation will address both the preparation and readiness for the team dentist. At the completion of Dr. Hoy’s presentation, participants will be able to prepare for and conduct pre-season exams, incorporate mouthguard impressions at the time of pre-season exams, put together a game-time emergency kit, and deal with common game-related issues.

These program employees 95 PRN athletic trainers who provided on site medical care at
Ken Locker is currently the Sports Marketing Manager at Texas Health Sports Medicine.
“Tireless service to the athletic training profession”. 2012 Everett Blackburn athletic trainer
Training Service Award created by the North Texas Athletic Trainers Society (NTATS) for
contribution of establishing the athletic trainer program. 2012 the Ken Locker Athletic
Award from the Professional Football Athletic Trainers Association (PFATS). Ken was
inducted into the Texas Woman’s University Athletics Hall of Fame in 2008 for his
Honors include the Volunteer of the year award presented by the National Athletic Trainers
Association Los Angeles Lakers and the Women’s National Basketball Association Los
Angles Sparks, he is the dental consultant for the Harvard Westlake High School Department
of Sports Medicine. Dr. Hoy maintains a full-time private practice in Torrance, California.

Jeffrey Hoy, DDS, FASD
Dr. Jeffrey Hoy graduated from the University of Southern California School of Dentistry and
has been treating dental trauma and sports-related dental injuries for over 30 years. Dr. Hoy is an active member of the Academy of Osseointegration, the Academy of Dental Sleep Medicine, the Academy for Sports Dentistry, and the International Association of Dental Traumatology. Dr. Hoy is a member of the National Hockey League Team Dentists Association and currently serves on the Board of Directors of the Academy for Sports Dentistry as secretary. In addition to serving as team dentist for the National Basketball Association Los Angeles Lakers and the Women’s National Basketball Association Los Angeles Sparks, he is the dental consultant for the Harvard Westlake High School Department of Sports Medicine. Dr. Hoy maintains a full-time private practice in Torrance, California.

Ken W. Locker, MA, ATC
Ken received his undergraduate degree from North Texas State University in 1973, BS Physical Education and his MA in Physical Education from Texas Woman’s University in 1976. Dr. David Grogan is an Associate Professor and Chairman in the department of Oral & Maxillofacial Surgery and Pharmacology at Texas A&M Health Science Center Baylor College of Dentistry. He graduated from Baylor in 1981 and received an MS degree in Oral Surgery in 1986. He is a Diplomat of the American Board of Oral & Maxillofacial Surgery. After completion of his residency training, Dr. Grogan entered private practice as an oral and maxillofacial surgeon in Waco, Texas. He was an important participant in designing the new sedation and emergency guidelines for Texas dentists, on behalf of the Texas State Board of Dental Examiners. In 2003 and 2010, Dr. Grogan was voted “Teacher of the Year” by the Baylor undergraduate dental students.

Stephen Mills, DDS, FASD
Dr. Stephen Mills is originally from Peeskill, New York, and attended Westminster College in New Wilmington, Pennsylvania, where he received his Bachelor of Science in 1977. He then entered the State University of New York at Buffalo School of Dentistry and earned his DDS in 1981. After three years on active duty in the U.S. Army, he worked to get his certificate in pediatric dentistry at the Department of Pediatric Dentistry of the University of Connecticut, which he completed in 1987. Upon completion of his specialty training, he moved to Maine to enter into the private practice of pediatric dentistry. His commitment to sports dentistry began in 1981 as he followed the direction of his mentor and friend Dr. Cosmo Castaldi. He joined the Academy of Sports Dentistry, and after years on the board of directors, became president for 2001 - 2002. Currently he serves the Academy as the editor of its newsletter, which appears regularly in the internationally read journal Dental Traumatology. He is board certified in pediatric dentistry and is active in the Academy of Pediatric Dentistry, serving as a legislative advocate to the members of the U.S. Congress. He is also the president of the Maine Society of Pediatric Dentistry.

Leslie Rye, DDS, FASD, FAGD, FICD
Dr. Leslie Rye has provided general dental care for over 30 years in Reston, Virginia. She is a past president of the Academy for Sports Dentistry and has served on boards of several professional and community organizations. Dr. Rye has earned special professional recognitions as a fellow in the Academy of General Dentistry, the Academy for Sports Dentistry, and the International College of Dentists. She has been an educator in many oral medicine, pharmacology and sports dentistry programs. Dr. Rye has participated and chaired many school and community health outreach programs, which includes volunteering as a provider in custom mouthguard courses at Texas A&M Baylor College of Dentistry since 1995.
